

Breathe Easy with NOSK

Sported by asthma sufferer Korean Olympian Park Tae-hwan, NOSK's new nasal filters were created by Sam Joung International to reduce the inhalation of pollutants and allergens by over 80%.

You can still talk and eat wearing NOSK, which means it can become a seamless addition to your routine, and unlike masks, your glasses won't fog each time you breathe. Each filter is usable for up to 24 hours so you can just put it on in the morning on the way to work, and toss it in the trash upon arrival home.

NOSK[®]

Easy-to-insert Nasal Filter
www.e-nosk.com

Designed to fit comfortably in your nose, NOSK nasal filters allow users the freedom to talk, **and even eat** without the discomfort and inconvenience of traditional face masks.

NOSK nasal filters are great for sanitation men, taxi drivers, and workers who are exposed to pollutants and excessive dust.

Reduces inhalation of pollutants & allergens by over 80%

NOSK[®]
www.e-nosk.com

NOSK nasal filters have been proven to prevent respiratory and breathing difficulties from airborne irritants, aiding asthma and allergy sufferers, by reducing the inhalation of pollutants and allergens by over 80%.

NOSK nasal filters block hazardous substances, such as microscopic dust particles, airborne dust and pollen, improving the quality of air that you breathe.

Where to use NOSK Nasal Filters:

- In dusty and smoky areas ·
- At construction sites ·
- Visiting the hospital ·
- At the nail salon ·
- On the subway ·
- In a factory ·
- In the garage ·
- While driving ·

Great for salon workers and manicurists, **NOSK** eliminates the need for traditional and unattractive face masks.

Allergy sufferers breathe easy with **NOSK**. No more sprays and medications to worry about!

Perfect for the outdoors, **NOSK** removes dirt and allergens from the air.
